UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q
☒ Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended March 31, 2017
Commission File No. 001-14817

PACCAR Inc
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

91-0351110
(I.R.S. Employer Identification No.)

777 - 106th Ave. N.E., Bellevue, WA
(Address of principal executive offices)

98004
(Zip Code)

(425) 468-7400
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐
Non-accelerated filer ☐ Smaller reporting company ☐
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date.

Common Stock, $1 par value – 351,279,601 shares as of April 30, 2017
# INDEX

## PART I. FINANCIAL INFORMATION:

**ITEM 1.** FINANCIAL STATEMENTS:
- Consolidated Statements of Comprehensive Income (Loss) – Three Months Ended March 31, 2017 and 2016 (Unaudited)  
- Consolidated Balance Sheets – March 31, 2017 (Unaudited) and December 31, 2016  
- Notes to Consolidated Financial Statements (Unaudited)  

**ITEM 2.** MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS  
**ITEM 3.** QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK  
**ITEM 4.** CONTROLS AND PROCEDURES  

## PART II. OTHER INFORMATION:

**ITEM 1.** LEGAL PROCEEDINGS  
**ITEM 1A.** RISK FACTORS  
**ITEM 2.** UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

NOTE A - Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and the non-recurring European Commission charge) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2017 are not necessarily indicative of the results that may be expected for the year ending December 31, 2017. For further information, refer to the consolidated financial statements and footnotes included in PACCAR Inc’s (PACCAR or the Company) Annual Report on Form 10-K for the year ended December 31, 2016.

Earnings (Loss) per Share: Basic earnings (loss) per common share are computed by dividing earnings (loss) by the weighted average number of common shares outstanding, plus the effect of any participating securities. Diluted earnings (loss) per common share are computed assuming that all potentially dilutive securities are converted into common shares under the treasury stock method. For the three months ended March 31, 2016, potentially dilutive options of 548,800 were excluded from the calculation of diluted loss per share as their inclusion would have been antidilutive due to the net loss in the first quarter of 2016. The dilutive and antidilutive options are shown separately in the table below.

New Accounting Pronouncements: In March 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-07, Compensation – Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The amendment disaggregates the service cost component from non-service cost components of pension expense and prescribes where to present the various components of pension cost on the income statement. This ASU also allows only the service cost component to be eligible for capitalization, when applicable (e.g. as a cost of manufactured inventory or self-constructed assets). The ASU is effective for reporting periods beginning after December 15, 2017, including interim periods within those annual periods, and early adoption is permitted. Upon adoption, the income statement presentation of service and non-service components of pension expense should be applied retrospectively, while the capitalization of service cost is to be applied prospectively. The Company is currently evaluating the impact on its consolidated financial statements.

In October 2016, the FASB issued ASU 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory. The amendment in this ASU requires recognition of income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. Currently the recognition of current and deferred income taxes for an intra-entity asset transfer is recognized when the asset has been sold to an outside party. This ASU is effective for annual reporting periods beginning after December 15, 2017 and interim periods within those annual periods, and early adoption is permitted. This amendment should be applied on a modified retrospective basis with a cumulative effect adjustment to retained earnings as of the beginning of the period of adoption. The Company adopted this ASU on January 1, 2017. The effect of the adoption reduced prepaid income taxes and retained earnings by $19.9. Because the corresponding deferred tax asset is not realizable, the Company recorded an offsetting valuation allowance.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. The amendment in this ASU addresses diversity in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The ASU is effective for annual periods beginning after December 15, 2017 and interim periods within those annual periods. Early adoption is permitted. This standard should be applied using a retrospective transition method to each period presented. If it is impracticable to apply the standard retrospectively, the standard would be applied prospectively as of the earliest date practicable. The Company is currently evaluating the impact on its consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The amendment in this ASU requires entities having financial assets measured at amortized cost to estimate credit reserves under an expected credit loss model rather than the current incurred loss model. Under this new model, expected credit losses will be based on relevant information about past events, including historical experience, current conditions and reasonable and supportable forecasts that affect collectability. The ASU is effective for annual periods beginning after December 15, 2019 and interim periods within those annual periods. Early adoption is permitted, but not earlier than annual and interim periods beginning after December 15, 2018. This amendment should be applied on a modified retrospective basis with a cumulative effect adjustment to
retained earnings as of the beginning of the period of adoption. The Company is currently evaluating the impact on its consolidated financial statements.
In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)* which amends the existing accounting standards for leases. Under the new lease standard, lessees will recognize a right-of-use asset and a lease liability for virtually all leases (other than short-term leases). Lessor accounting is largely unchanged. The ASU is effective for annual periods beginning after December 15, 2018 and interim periods within those annual periods. Early adoption is permitted. This ASU requires leases to be recognized and measured at the beginning of the earliest period presented using a modified retrospective approach. The Company is currently evaluating the impact on its consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. The amendment in this ASU addresses the recognition, measurement, presentation and disclosure of financial instruments. The ASU is effective for annual periods beginning after December 15, 2017 and interim periods within those annual periods. This amendment is applied with a cumulative effect adjustment as of the beginning of the period of adoption. The Company is currently evaluating the impact on its consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*. This ASU amends the existing accounting standards for revenue recognition. Under the new revenue recognition model, a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The FASB has subsequently issued several related ASUs to clarify the implementation guidance in ASU 2014-09. This standard may be applied retrospectively to each prior period presented or modified retrospectively with a cumulative effect recognized as of the date of initial application. The Company expects to adopt this ASU in January 2018 on a modified retrospective basis, with the cumulative effect adjustment recognized into retained earnings as of January 1, 2018.

The Company’s evaluation of the new standard is substantially complete, and the Company does not expect adoption of the new standard to have a material impact on the income statement or retained earnings. The Company currently expects the most significant effect of the standard relates to trucks sold in Europe that are subject to a residual value guarantee (RVG) and are currently accounted for as an operating lease in the Truck, Parts and Other section of the Company’s Consolidated Balance Sheets (see Note E in the 2016 Form 10-K). Under the new standard, based on the Company’s current assessment, revenues would be recognized immediately for certain of these RVG contracts that allow customers the option to return their truck and for which there is no economic incentive to do so. Based on the existing portfolio of RVG contracts, under the new standard, revenues are expected to be recognized immediately for approximately half of the RVG portfolio instead of being deferred and amortized over the life of the RVG contract. The Company will continue to evaluate the new standard, including any new interpretive guidance, and any related impact to its financial statements.

In addition to ASU 2016-16 disclosed above, the Company adopted the following standards effective January 1, 2017, none of which had a material impact on the Company’s consolidated financial statements.

** The Company adopted on the effective date of January 1, 2017.
NOTE B - Investments in Marketable Debt Securities

The Company’s investments in marketable debt securities are classified as available-for-sale. These investments are stated at fair value with any unrealized gains or losses, net of tax, included as a component of accumulated other comprehensive income (loss) (AOCI).

The Company utilizes third-party pricing services for all of its marketable debt security valuations. The Company reviews the pricing methodology used by the third-party pricing services, including the manner employed to collect market information. On a quarterly basis, the Company also performs review and validation procedures on the pricing information received from the third-party providers. These procedures help ensure that the fair value information used by the Company is determined in accordance with applicable accounting guidance.

The Company evaluates its investment in marketable debt securities at the end of each reporting period to determine if a decline in fair value is other-than-temporary. Realized losses are recognized upon management’s determination that a decline in fair value is other-than-temporary. The determination of other-than-temporary impairment is a subjective process, requiring the use of judgments and assumptions regarding the amount and timing of recovery. The Company reviews and evaluates its investments at least quarterly to identify investments that have indications of other-than-temporary impairments. It is reasonably possible that a change in estimate could occur in the near term relating to other-than-temporary impairment. Accordingly, the Company considers several factors when evaluating debt securities for other-than-temporary impairment, including whether the decline in fair value of the security is due to increased default risk for the specific issuer or market interest rate risk.

In assessing default risk, the Company considers the collectability of principal and interest payments by monitoring changes to issuers’ credit ratings, specific credit events associated with individual issuers as well as the credit ratings of any financial guarantor, and the extent and duration to which amortized cost exceeds fair value.

In assessing market interest rate risk, including benchmark interest rates and credit spreads, the Company considers its intent for selling the securities and whether it is more likely than not the Company will be able to hold these securities until the recovery of any unrealized losses.

 Marketable debt securities at March 31, 2017 and December 31, 2016 consisted of the following:

Notes to Consolidated Financial Statements (Unaudited)  
(Millions, Except Share Amounts)

The cost of marketable debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. Amortization, accretion, interest and dividend income and realized gains and losses are included in investment income. The cost of securities sold is based on the specific identification method. Gross realized gains were $.5 and $.8 and gross realized losses were $.2 and $.1 for the three months ended March 31, 2017 and 2016, respectively.

Marketable debt securities with continuous unrealized losses and their related fair values were as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>Less Than Twelve Months</th>
<th>Twelve Months Or Greater</th>
<th>Less Than Twelve Months</th>
<th>Twelve Months Or Greater</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 31, 2017</td>
<td>$395.4</td>
<td></td>
<td>$615.5</td>
<td></td>
</tr>
<tr>
<td>December 31, 2016</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fair value</td>
<td>$395.4</td>
<td></td>
<td>$615.5</td>
<td></td>
</tr>
<tr>
<td>Unrealized losses</td>
<td>1.2</td>
<td></td>
<td>3.7</td>
<td></td>
</tr>
</tbody>
</table>

For the investment securities in gross unrealized loss positions identified above, the Company does not intend to sell the investment securities. It is more likely than not that the Company will not be required to sell the investment securities before recovery of the unrealized losses, and the Company expects that the contractual principal and interest will be received on the investment securities. As a result, the Company recognized no other-than-temporary impairments during the periods presented.

Contractual maturities on marketable debt securities at March 31, 2017 were as follows:

<table>
<thead>
<tr>
<th>Maturities</th>
<th>Amortized Cost</th>
<th>Fair Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Within one year</td>
<td>$308.2</td>
<td>$308.4</td>
</tr>
<tr>
<td>One to five years</td>
<td>886.6</td>
<td>888.8</td>
</tr>
<tr>
<td>Six to ten years</td>
<td>.1</td>
<td>.1</td>
</tr>
<tr>
<td>More than ten years</td>
<td>9.1</td>
<td>9.1</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>1,204.0</strong></td>
<td><strong>1,206.4</strong></td>
</tr>
</tbody>
</table>

NOTE C - Inventories

Inventories are stated at the lower of cost or market. Cost of inventories in the U.S. is determined principally by the last-in, first-out (LIFO) method. Cost of all other inventories is determined principally by the first-in, first-out (FIFO) method.

Inventories include the following:

<table>
<thead>
<tr>
<th>Description</th>
<th>March 31, 2017</th>
<th>December 31, 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>Finished products</td>
<td>$465.7</td>
<td>$452.3</td>
</tr>
<tr>
<td>Work in process and raw materials</td>
<td>476.9</td>
<td>444.7</td>
</tr>
<tr>
<td>Less LIFO reserve</td>
<td>(170.4)</td>
<td>(169.2)</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$772.2</strong></td>
<td><strong>$727.8</strong></td>
</tr>
</tbody>
</table>

Under the LIFO method of accounting (used for approximately 47% of March 31, 2017 inventories), an actual valuation can be made only at the end of each year based on year-end inventory levels and costs. Accordingly, interim valuations are based on management’s estimates of those year-end amounts.
NOTE D - Finance and Other Receivables

Finance and other receivables include the following:

<table>
<thead>

</tr>
<tr>
<td></td>
<td>$ 8,971.0</td>
<td>$ 8,837.4</td>
</tr>
</tbody>
</table>

Recognition of interest income and rental revenue is suspended (put on non-accrual status) when the receivable becomes more than 90 days past the contractual due date or earlier if some other event causes the Company to determine that collection is not probable. Accordingly, no finance receivables more than 90 days past due were accruing interest at March 31, 2017 or December 31, 2016. Recognition is resumed if the receivable becomes current by the payment of all amounts due under the terms of the existing contract and collection of remaining amounts is considered probable (if not contractually modified) or if the customer makes scheduled payments for three months and collection of remaining amounts is considered probable (if contractually modified). Payments received while the finance receivable is on non-accrual status are applied to interest and principal in accordance with the contractual terms.

Allowance for Credit Losses

The Company continuously monitors the payment performance of its finance receivables. For large retail finance customers and dealers with wholesale financing, the Company regularly reviews their financial statements and makes site visits and phone contact as appropriate. If the Company becomes aware of circumstances that could cause those customers or dealers to face financial difficulty, whether or not they are past due, the customers are placed on a watch list.

The Company modifies loans and finance leases in the normal course of its Financial Services operations. The Company may modify loans and finance leases for commercial reasons or for credit reasons. Modifications for commercial reasons are changes to contract terms for customers that are not considered to be in financial difficulty. Insignificant delays are modifications extending terms up to three months for customers experiencing some short-term financial stress, but not considered to be in financial difficulty. Modifications for credit reasons are changes to contract terms for customers considered to be in financial difficulty. The Company’s modifications typically result in granting more time to pay the contractual amounts owed and charging a fee and interest for the term of the modification.

When considering whether to modify customer accounts for credit reasons, the Company evaluates the creditworthiness of the customers and modifies those accounts that the Company considers likely to perform under the modified terms. When the Company modifies loans and finance leases for credit reasons and grants a concession, the modifications are classified as troubled debt restructurings (TDR). The Company does not typically grant credit modifications for customers that do not meet minimum underwriting standards since the Company normally repossesses the financed equipment in these circumstances. When such modifications do occur, they are considered TDRs.

On average, modifications extended contractual terms by approximately three months in 2017 and four months in 2016 and did not have a significant effect on the weighted average term or interest rate of the total portfolio at March 31, 2017 and December 31, 2016.

The Company has developed a systematic methodology for determining the allowance for credit losses for its two portfolio segments, retail and wholesale. The retail segment consists of retail loans and direct and sales-type finance leases, net of unearned interest. The wholesale segment consists of truck inventory financing loans to dealers that are collateralized by trucks and other collateral.
The wholesale segment generally has less risk than the retail segment. Wholesale receivables generally are shorter in duration than retail receivables, and the Company requires periodic reporting of the wholesale dealer’s financial condition, conducts periodic audits of the trucks being financed and in many cases, obtains guarantees or other security such as dealership assets. In determining the allowance for credit losses, retail loans and finance leases are evaluated together since they relate to a similar customer base, their contractual terms require regular payment of principal and interest, generally over 36 to 60 months, and they are secured by the same type of collateral. The allowance for credit losses consists of both specific and general reserves.

The Company individually evaluates certain finance receivables for impairment. Finance receivables that are evaluated individually for impairment consist of all wholesale accounts and certain large retail accounts with past due balances or otherwise determined to be at a higher risk of loss. A finance receivable is impaired if it is considered probable the Company will be unable to collect all contractual interest and principal payments as scheduled. In addition, all retail loans and leases which have been classified as TDRs and all customer accounts over 90 days past due are considered impaired. Generally, impaired accounts are on non-accrual status. Impaired accounts classified as TDRs which have been performing for 90 consecutive days are placed on accrual status if it is deemed probable that the Company will collect all principal and interest payments.

Impaired receivables are generally considered collateral dependent. Large balance retail and all wholesale impaired receivables are individually evaluated to determine the appropriate reserve for losses. The determination of reserves for large balance impaired receivables considers the fair value of the associated collateral. When the underlying collateral fair value exceeds the Company’s recorded investment, no reserve is recorded. Small balance impaired receivables with similar risk characteristics are evaluated as a separate pool to determine the appropriate reserve for losses using the historical loss information discussed below.

The Company evaluates finance receivables that are not individually impaired on collective basis and determines the general allowance for credit losses for both retail and wholesale receivables based on historical loss information, using past due account data and current market conditions. Information used includes assumptions regarding the likelihood of collecting current and past due accounts, repossession rates, the recovery rate on the underlying collateral based on used truck values and other pledged collateral or recourse. The Company has developed a range of loss estimates for each of its country portfolios based on historical experience, taking into account loss frequency and severity in both strong and weak truck market conditions. A projection is made of the range of estimated credit losses inherent in the portfolio from which an amount is determined as probable based on current market conditions and other factors impacting the creditworthiness of the Company’s borrowers and their ability to repay. After determining the appropriate level of the allowance for credit losses, a provision for losses on finance receivables is charged to income as necessary to reflect management’s estimate of incurred credit losses, net of recoveries, inherent in the portfolio.

In determining the fair value of the collateral, the Company uses a pricing matrix and categorizes the fair value as Level 2 in the hierarchy of fair value measurement. The pricing matrix is reviewed quarterly and updated as appropriate. The pricing matrix considers the make, model and year of the equipment as well as recent sales prices of comparable equipment sold individually, which is the lowest unit of account, through wholesale channels to the Company’s dealers (principal market). The fair value of the collateral also considers the overall condition of the equipment.

Accounts are charged-off against the allowance for credit losses when, in the judgment of management, they are considered uncollectible, which generally occurs upon repossession of the collateral. Typically the timing between the repossession and charge-off is not significant. In cases where repossession is delayed (e.g., for legal proceedings), the Company records a partial charge-off. The charge-off is determined by comparing the fair value of the collateral, less cost to sell, to the recorded investment.

For the following credit quality disclosures, finance receivables are classified into two portfolio segments, wholesale and retail. The retail portfolio is further segmented into dealer retail and customer retail. The dealer wholesale segment consists of truck inventory financing to PACCAR dealers. The dealer retail segment consists of loans and leases to participating dealers and franchises that use the proceeds to fund customers’ acquisition of commercial vehicles and related equipment. The customer retail segment consists of loans and leases directly to customers for the acquisition of commercial vehicles and related equipment. Customer retail receivables are further segregated between fleet and owner/operator classes. The fleet class consists of customer retail accounts operating more than five trucks. All other customer retail accounts are considered owner/operator. These two classes have similar measurement attributes, risk characteristics and common methods to monitor and assess credit risk.
The allowance for credit losses is summarized as follows:

- 14 -
Credit Quality

The Company’s customers are principally concentrated in the transportation industry in North America, Europe and Australia. The Company’s portfolio assets are diversified over a large number of customers and dealers with no single customer or dealer balances representing over 5% of the total portfolio assets. The Company retains as collateral a security interest in the related equipment.

At the inception of each contract, the Company considers the credit risk based on a variety of credit quality factors including prior payment experience, customer financial information, credit-rating agency ratings, loan-to-value ratios and other internal metrics. On an ongoing basis, the Company monitors credit quality based on past due status and collection experience as there is a meaningful correlation between the past due status of customers and the risk of loss.

The Company has three credit quality indicators: performing, watch and at-risk. Performing accounts pay in accordance with the contractual terms and are not considered high-risk. Watch accounts include accounts 31 to 90 days past due and large accounts that are performing but are considered to be high-risk. Watch accounts are not impaired. At-risk accounts are accounts that are impaired, including TDRs, accounts over 90 days past due and other accounts on non-accrual status. The tables below summarize the Company’s finance receivables by credit quality indicator and portfolio class.

<table>
<thead>
<tr>
<th></th>

<td>$ 1,528.5</td>
<td>$ 1,406.0</td>
</tr>
</tbody>
</table>

The tables below summarize the Company’s finance receivables by aging category. In determining past due status, the Company considers the entire contractual account balance past due when any installment is over 30 days past due. Substantially all customer accounts that were greater than 30 days past due prior to credit modification became current upon modification for aging purposes.

<table>
<thead>
<tr>

</table>
Troubled Debt Restructurings

The balance of TDRs was $44.5 and $43.1 at March 31, 2017 and December 31, 2016, respectively. At modification date, the pre-modification and post-modification recorded investment balances for finance receivables modified during the period by portfolio class are as follows:

<table>
<thead>
<tr>
<th>Portfolio Class</th>
<th>Three Months Ended March 31,</th>
<th>2017</th>
<th>2016</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>PRE-MODIFICATION</td>
<td>POST-MODIFICATION</td>
<td>PRE-MODIFICATION</td>
</tr>
<tr>
<td>Fleet</td>
<td>$8.8</td>
<td>$8.8</td>
<td>$7.6</td>
</tr>
<tr>
<td>Owner/operator</td>
<td>.2</td>
<td>.1</td>
<td>1.9</td>
</tr>
<tr>
<td></td>
<td>$9.0</td>
<td>$8.9</td>
<td>$9.5</td>
</tr>
</tbody>
</table>

The effect on the allowance for credit losses from such modifications was not significant at March 31, 2017 and 2016.

TDRs modified during the previous twelve months that subsequently defaulted (i.e., became more than 30 days past due) during the period by portfolio class are as follows:

<table>
<thead>
<tr>
<th>Portfolio Class</th>
<th>Three Months Ended March 31,</th>
<th>2017</th>
<th>2016</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>PRE-MODIFICATION</td>
<td>POST-MODIFICATION</td>
<td>PRE-MODIFICATION</td>
</tr>
<tr>
<td>Fleet</td>
<td>$.2</td>
<td>$.2</td>
<td>$.2</td>
</tr>
<tr>
<td>Owner/operator</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>$.4</td>
<td>$.4</td>
<td>$.2</td>
</tr>
</tbody>
</table>

The TDRs that subsequently defaulted did not significantly impact the Company’s allowance for credit losses at March 31, 2017 and 2016.

Repossessions

When the Company determines a customer is not likely to meet its contractual commitments, the Company repossesses the vehicles which serve as collateral for the loans, finance leases and equipment under operating leases. The Company records the vehicles as used truck inventory included in Financial Services other assets on the Consolidated Balance Sheets. The balance of repossessed inventory at March 31, 2017 and December 31, 2016 was $24.6 and $25.4, respectively. Proceeds from the sales of repossessed assets were $15.5 and $12.4 for the three months ended March 31, 2017 and 2016, respectively. These amounts are included in proceeds from asset disposals in the Condensed Consolidated Statements of Cash Flows. Write-downs of repossessed equipment on operating leases are recorded as impairments and included in Financial Services depreciation and other expenses on the Consolidated Statements of Comprehensive Income (Loss).

NOTE E - Product Support Liabilities

Product support liabilities include estimated future payments related to product warranties and deferred revenues on optional extended warranties and repair and maintenance (R&M) contracts. The Company generally offers one year warranties covering most of its vehicles and related aftermarket parts. For vehicles equipped with engines manufactured by PACCAR, the Company generally offers two year warranties on the engine. Specific terms and conditions vary depending on the product and the country of sale. Optional extended warranty and R&M contracts can be purchased for periods which generally range up to five years. Warranty expenses and reserves are estimated and recorded at the time products or contracts are sold based on historical data regarding the source, frequency and cost of claims, net of any recoveries. The Company periodically assesses the adequacy of its recorded liabilities and adjusts them as appropriate to reflect actual experience. Revenue from extended warranty and R&M contracts is deferred and recognized to income generally on a straight-line basis over the contract period. Warranty and R&M costs on these contracts are recognized as incurred.
Changes in product support liabilities are summarized as follows:

<table>
<thead>
<tr>

Stock Compensation Plans

Stock-based compensation expense was $7.1 and $7.2 for the three months ended March 31, 2017 and 2016, respectively. Realized tax benefits related to the excess of deductible amounts over expense recognized amounted to nil and $.1 for the three months ended March 31, 2017 and 2016, respectively.

During the first quarter of 2017, the Company issued 535,123 common shares under deferred and stock compensation arrangements.
NOTE G - Income Taxes

The effective tax rate for the first quarter of 2017 was 30.8% compared to a negative 38.4% for the first quarter of 2016. Substantially all of the difference in tax rates was due to the non-deductible European Commission (EC) charge of $942.6 in 2016.

NOTE H - Segment Information

PACCAR operates in three principal segments: Truck, Parts and Financial Services. The Company evaluates the performance of its Truck and Parts segments based on operating profits, which excludes investment income, other income and expense, the EC charge and income taxes. The Financial Services segment’s performance is evaluated based on income before income taxes. The accounting policies of the reportable segments are the same as those applied in the consolidated financial statements as described in Note A of the Company’s Annual Report on Form 10-K for the year ended December 31, 2016.

Truck and Parts

The Truck segment includes the design and manufacture of high-quality, light-, medium- and heavy-duty commercial trucks and the Parts segment includes the distribution of aftermarket parts for trucks and related commercial vehicles, both of which are sold through the same network of independent dealers. These segments derive a large proportion of their revenues and operating profits from operations in North America and Europe. The Truck segment incurs substantial costs to design, manufacture and sell trucks to its customers. The sale of new trucks provides the Parts segment with the basis for parts sales that may continue over the life of the truck, but are generally concentrated in the first five years after truck delivery. To reflect the benefit the Parts segment receives from costs incurred by the Truck segment, certain expenses are allocated from the Truck segment to the Parts segment. The expenses allocated are based on a percentage of the average annual expenses for factory overhead, engineering, research and development and selling, general and administrative (SG&A) expenses for the preceding five years. The allocation is based on the ratio of the average parts direct margin dollars (net sales less material and labor costs) to the total truck and parts direct margin dollars for the previous five years. The Company believes such expenses have been allocated on a reasonable basis. Truck segment assets related to the indirect expense allocation are not allocated to the Parts segment.

Financial Services

The Financial Services segment derives its earnings primarily from financing or leasing of PACCAR products and services provided to truck customers and dealers. Revenues are primarily generated from operations in North America and Europe.
Included in Other is the Company’s industrial winch manufacturing business. Also within this category are other sales, income and expense not attributable to a reportable segment, including the EC charge and a portion of corporate expenses.

* Other includes the $942.6 EC charge for the first three months of 2016.

**NOTE I - Derivative Financial Instruments**

As part of its risk management strategy, the Company enters into derivative contracts to hedge against interest rates and foreign currency risk. Certain derivative instruments designated as either cash flow hedges or fair value hedges are subject to hedge accounting. Derivative instruments that are not subject to hedge accounting are held as economic hedges. The Company’s policies prohibit the use of derivatives for speculation or trading. At the inception of each hedge relationship, the Company documents its risk management objectives, procedures and accounting treatment. All of the Company’s interest-rate and certain foreign-exchange contracts are transacted under International Swaps and Derivatives Association (ISDA) master agreements. Each agreement permits the net settlement of amounts owed in the event of default and certain other termination events. For derivative financial instruments, the Company has elected not to offset derivative positions in the balance sheet with the same counterparty under the same agreements and is not required to post or receive collateral.

Exposure limits and minimum credit ratings are used to minimize the risks of counterparty default. The Company’s maximum exposure to potential default of its swap counterparties is limited to the asset position of its swap portfolio. The asset position of the Company’s swap portfolio is $68.7 at March 31, 2017.
The Company uses regression analysis to assess effectiveness of interest-rate contracts on a quarterly basis. For foreign-exchange contracts, the Company performs quarterly assessments to ensure that critical terms continue to match. All components of the derivative instrument’s gain or loss are included in the assessment of hedge effectiveness. Gains or losses on the ineffective portion of cash flow hedges are recognized currently in earnings. Hedge accounting is discontinued prospectively when the Company determines that a derivative financial instrument has ceased to be a highly effective hedge.

**Interest-Rate Contracts:** The Company enters into various interest-rate contracts, including interest-rate swaps and cross currency interest-rate swaps. Interest-rate swaps involve the exchange of fixed for floating rate or floating for fixed rate interest payments based on the contractual notional amounts in a single currency. Cross currency interest-rate swaps involve the exchange of notional amounts and interest payments in different currencies. The Company is exposed to interest-rate and exchange-rate risk caused by market volatility as a result of its borrowing activities. The objective of these contracts is to mitigate the fluctuations on earnings, cash flows and fair value of borrowings. Net amounts paid or received are reflected as adjustments to interest expense.

At March 31, 2017, the notional amount of the Company’s interest-rate contracts was $3,007.6. Notional maturities for all interest-rate contracts are $551.6 for the remainder of 2017, $1,063.4 for 2018, $907.8 for 2019, $288.8 for 2020, $196.0 for 2021 and nil thereafter.

**Foreign-Exchange Contracts:** The Company enters into foreign-exchange contracts to hedge certain anticipated transactions and assets and liabilities denominated in foreign currencies, particularly the Canadian dollar, the euro, the British pound, the Australian dollar, the Brazilian real and the Mexican peso. The objective is to reduce fluctuations in earnings and cash flows associated with changes in foreign currency exchange rates. At March 31, 2017, the notional amount of the outstanding foreign-exchange contracts was $624.2. Foreign-exchange contracts mature within one year.
The following table presents the balance sheet classification, fair value, gross and pro forma net amounts of derivative financial instruments:

</tr>
</tbody>
</table>
Notes to Consolidated Financial Statements (Unaudited) (Millions, Except Share Amounts)

Cash Flow Hedges

Substantially all of the Company’s interest-rate contracts and some foreign-exchange contracts have been designated as cash flow hedges. Changes in the fair value of derivatives designated as cash flow hedges are recorded in AOCI to the extent such hedges are considered effective. Amounts in AOCI are reclassified into net income in the same period in which the hedged transaction affects earnings. The maximum length of time over which the Company is hedging its exposure to the variability in future cash flows is 4.4 years. For the quarters ended March 31, 2017 and 2016, the Company recognized no gains and losses or losses on the ineffective portion.

The following table presents the pre-tax effects of derivative instruments recognized in other comprehensive income (loss) (OCI):

<table>
<thead>
<tr>

<tr>
<td></td>
<td>Expense (income) reclassified out of AOCI into income was as follows:</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| The amount of loss recorded in AOCI at March 31, 2017 that is estimated to be reclassified into earnings in the following 12 months if interest rates and exchange rates remain unchanged is approximately $8.8, net of taxes. The fixed interest earned on finance receivables will offset the amount recognized in interest expense, resulting in a stable interest margin consistent with the Company’s risk management strategy.

The amount of losses reclassified out of AOCI into net income based on the probability that the original forecasted transactions would not occur was nil and $.6 for the quarters ended March 31, 2017 and 2016, respectively.

- 24 -
Economic Hedges

For other risk management purposes, the Company enters into derivative instruments that do not qualify for hedge accounting. These derivative instruments are used to mitigate the risk of market volatility arising from borrowings and foreign currency denominated transactions. Changes in the fair value of economic hedges are recorded in earnings in the period in which the change occurs.

For the quarters ended March 31, 2017 and 2016, expense (income) recognized in earnings related to interest-rate contracts was nil for both periods. The expense (income) recognized in earnings related to foreign-exchange contracts was as follows:

<table>

NOTE J - Fair Value Measurements

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Inputs to valuation techniques used to measure fair value are either observable or unobservable. These inputs have been categorized into the fair value hierarchy described below.

- **Level 1** – Valuations are based on quoted prices that the Company has the ability to obtain in actively traded markets for identical assets or liabilities. Since valuations are based on quoted prices that are readily and regularly available in an active market or exchange traded market, valuation of these instruments does not require a significant degree of judgment.

- **Level 2** – Valuations are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

- **Level 3** – Valuations are based on model-based techniques for which some or all of the assumptions are obtained from indirect market information that is significant to the overall fair value measurement and which require a significant degree of management judgment.

There were no transfers of assets or liabilities between Level 1 and Level 2 of the fair value hierarchy during the three months ended March 31, 2017. The Company’s policy is to recognize transfers between levels at the end of the reporting period.

The Company uses the following methods and assumptions to measure fair value for assets and liabilities subject to recurring fair value measurements.

** Marketable Securities:** The Company’s marketable debt securities consist of municipal bonds, government obligations, investment-grade corporate obligations, commercial paper, asset-backed securities and term deposits. The fair value of U.S. government obligations is determined using the market approach and is based on quoted prices in active markets and are categorized as Level 1.

The fair value of U.S. government agency obligations, non-U.S. government bonds, municipal bonds, corporate bonds, asset-backed securities, commercial paper and term deposits is determined using the market approach and is primarily based on matrix pricing as a practical expedient which does not rely exclusively on quoted prices for a specific security. Significant inputs used to determine fair value include interest rates, yield curves, credit rating of the security and other observable market information and are categorized as Level 2.

**Derivative Financial Instruments:** The Company’s derivative contracts consist of interest-rate swaps, cross currency swaps and foreign currency exchange contracts. These derivative contracts are traded over the counter and their fair value is determined using industry standard valuation models, which are based on the income approach (i.e., discounted cash flows). The significant observable inputs into the valuation models include interest rates, yield curves, currency exchange rates, credit default swap spreads and forward rates and are categorized as Level 2.
### Assets and Liabilities Subject to Recurring Fair Value Measurement

The Company’s assets and liabilities subject to recurring fair value measurements are either Level 1 or Level 2 as follows:

<table>
<thead>

## Fair Value Disclosure of Other Financial Instruments

For financial instruments that are not recognized at fair value, the Company uses the following methods and assumptions to determine the fair value. These instruments are categorized as Level 2, except cash which is categorized as Level 1 and fixed rate loans which are categorized as Level 3.

### Cash and Cash Equivalents: Carrying amounts approximate fair value.

### Financial Services Net Receivables: For floating-rate loans, wholesale financings, and operating lease and other trade receivables, carrying values approximate fair values. For fixed rate loans, fair values are estimated using the income approach by discounting cash flows to their present value based on current rates for comparable loans. Finance lease receivables and related allowance for credit losses have been excluded from the accompanying table.

### Debt: The carrying amounts of financial services commercial paper, variable rate bank loans and variable rate term notes approximate fair value. For fixed rate debt, fair values are estimated using the income approach by discounting cash flows to their present value based on current rates for comparable debt.

The Company’s estimate of fair value for fixed rate loans and debt that are not carried at fair value was as follows:

<table>
<thead>
<tr>
<th>March 31, 2017</th>
<th>December 31, 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CARRYING AMOUNT</strong></td>
<td><strong>FAIR VALUE</strong></td>

</tbody>
</table>
NOTE K - Employee Benefit Plans

The Company has several defined benefit pension plans, which cover a majority of its employees. The following information details the components of net pension expense for the Company’s defined benefit plans:

<table>
<thead>
<tr>
<th>Three Months Ended March 31,</th>
<th>2017</th>
<th>2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>Service cost</td>
<td>$ 23.8</td>
<td>$ 21.9</td>
</tr>
<tr>
<td>Interest on projected benefit obligation</td>
<td>20.4</td>
<td>23.6</td>
</tr>
<tr>
<td>Expected return on assets</td>
<td>(39.8)</td>
<td>(35.6)</td>
</tr>
<tr>
<td>Amortization of prior service costs</td>
<td>.3</td>
<td>.3</td>
</tr>
<tr>
<td>Recognized actuarial loss</td>
<td>6.7</td>
<td>6.5</td>
</tr>
<tr>
<td>Net pension expense</td>
<td>$ 11.4</td>
<td>$ 16.7</td>
</tr>
</tbody>
</table>

On January 1, 2017, the Company changed the method used to estimate service cost and interest cost components of pension expense from a single weighted-average method, which is a single discount rate determined at the pension plans measurement date, to an individual spot rate approach, which applies specific spot rates along the yield curve to the relevant projected cash flows. This approach is a more precise measurement of net periodic benefit costs and does not impact the benefit obligation. The Company considers this a change in estimate inseparable from a change in accounting principle and is being accounted for prospectively. This change will lower net pension expense by approximately $15.0 in 2017.

During the three months ended March 31, 2017 and 2016, the Company contributed $4.9 and $5.1 to its pension plans, respectively.

NOTE L - Commitments and Contingencies

In the first quarter of 2016, the Company recorded a charge of €850.0 ($942.6) in connection with an investigation by the EC of all major European truck manufacturers, including DAF Trucks N.V., its subsidiary DAF Trucks Deutschland GmbH (collectively, “DAF”) and the Company as their parent. On July 19, 2016, the EC reached a settlement with DAF and the Company under which the EC imposed a fine of €752.7 ($833.0) for infringement of European Union competition rules. As a result of the settlement, the Company reversed, in the second quarter of 2016, €97.3 ($109.6) of the previously recorded charge. DAF paid the fine in August 2016. Following the EC settlement, claims and a petition to certify a claim as a class action have been filed against DAF and other truck manufacturers. Others may bring EC-related claims against the Company or its subsidiaries. While the Company believes it has meritorious defenses, such claims will likely take a significant period of time to resolve, and it is not possible to estimate a range of potential loss. An adverse outcome of such proceedings could have a material impact on the Company’s results of operations.

The Company is a defendant in various legal proceedings and, in addition, there are various other contingent liabilities arising in the normal course of business. After consultation with legal counsel, management does not anticipate that disposition of these various proceedings and contingent liabilities will have a material effect on the consolidated financial statements.
ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW:
PACCAR is a global technology company whose Truck segment includes the design and manufacture of high-quality light-, medium- and heavy-duty commercial trucks. In North America, trucks are sold under the Kenworth and Peterbilt nameplates, in Europe, under the DAF nameplate and in Australia and South America, under the Kenworth and DAF nameplates. The Parts segment includes the distribution of aftermarket parts for trucks and related commercial vehicles. The Company’s Financial Services segment derives its earnings primarily from financing or leasing PACCAR products in North America, Europe and Australia. The Company’s Other business includes the manufacturing and marketing of industrial winches.

First Quarter Financial Highlights
• Worldwide net sales and revenues were $4.24 billion in 2017 compared to $4.30 billion in 2016.
• Truck sales were $3.13 billion in 2017 compared to $3.27 billion in 2016, primarily due to lower industry truck sales in the U.S. and Canada.
• Parts sales were $786.7 million in 2017 compared to $719.5 million in 2016, reflecting higher demand in the U.S. and Canada.
• Financial Services revenues were $302.2 million in 2017 compared to $289.4 million in 2016. The increase was primarily revenues from higher average operating lease assets.
• Net income was $310.3 million ($0.88 per diluted share) in 2017 compared to a net loss of $594.6 million ($1.69 per diluted share) in 2016. Excluding a $942.6 million non-recurring, non-taxable charge for the European Commission investigation of all major European truck manufacturers, the Company earned adjusted net income (non-GAAP) of $348.0 million ($0.99 per diluted share) in the first quarter of 2016. See Reconciliation of GAAP to non-GAAP Financial Measures on page 41. The operating results reflect lower truck sales in the U.S. and Canada, partially offset by record worldwide Parts segment profit.
• Capital investments were $72.7 million in 2017 compared to $62.1 million in 2016, reflecting additional investments for the construction of a new DAF cab paint facility in Europe and new products.
• Research and development (R&D) expenses were $61.0 million in 2017 compared to $59.6 million in 2016.

Kenworth and Peterbilt recently introduced set-forward front axle (SFFA) vocational models. The Kenworth T880S and the Peterbilt Model 567 SFFA trucks are designed to optimize weight distribution and maximize payload in construction, concrete mixer and other applications supporting infrastructure investments. DAF also introduced their new 2017 XF and CF trucks, which incorporate advanced aerodynamics, enhanced powertrain performance and lightweight materials to improve fuel efficiency.

PACCAR Financial Services (PFS) has operations covering four continents and 24 countries. PFS, with its global breadth and its rigorous credit application process, supports a portfolio of loans and leases with total assets of $12.27 billion. PFS issued $400 million in medium-term notes to repay maturing debt.

Truck Outlook
Truck industry retail sales in the U.S. and Canada in 2017 are expected to be 190,000 to 220,000 units compared to 215,700 in 2016. In Europe, the 2017 truck industry registrations for over 16-tonne vehicles are expected to be 270,000 to 300,000 units compared to 302,500 in 2016. In South America, heavy-duty truck industry sales in 2017 are estimated to be in a range of 55,000 to 65,000 units compared to 56,300 in 2016.

Parts Outlook
In 2017, PACCAR Parts sales in North America are expected to grow 4-6% compared to 2016 sales. In 2017, Europe aftermarket sales are expected to increase 1-2%.
Financial Services Outlook

Based on the truck market outlook, average earning assets in 2017 are expected to be comparable to 2016. Current good levels of freight tonnage, freight rates and fleet utilization are contributing to customers’ profitability and cash flow. If current freight transportation conditions decline due to weaker economic conditions, then past due accounts, truck repossessions and credit losses would likely increase from the current low levels and new business volume would likely decline.

Capital Spending and R&D Outlook

Capital investments in 2017 are expected to be $375 to $425 million, and R&D is expected to be $250 to $280 million. The Company is investing for future growth in PACCAR’s integrated powertrain, advanced driver assistance and truck connectivity technologies, and additional capacity and operating efficiency of the Company’s manufacturing and parts distribution facilities. DAF’s new $110 million cab paint facility is on schedule to open in mid-2017.

See the Forward-Looking Statements section of Management’s Discussion and Analysis for factors that may affect these outlooks.

The following provides an analysis of the results of operations for the Company’s three reportable segments - Truck, Parts and Financial Services. Where possible, the Company has quantified the impact of factors identified in the following discussion and analysis. In cases where it is not possible to quantify the impact of factors, the Company lists them in estimated order of importance. Factors for which the Company is unable to specifically quantify the impact include market demand, fuel prices, freight tonnage and economic conditions affecting the Company’s results of operations.
2017 Compared to 2016:

Truck

The Company’s Truck segment accounted for 74% of revenues in the first quarter of 2017 compared to 76% in the first quarter of 2016.

The Company’s new truck deliveries are summarized below:

<table>
<thead>
<tr>

</tbody>
</table>

In the first quarter of 2017, industry retail sales in the heavy-duty market in the U.S. and Canada decreased to 41,800 units from 57,200 units in the same period of 2016. The Company’s heavy-duty truck retail market share increased to 28.2% in the first quarter of 2017 from 25.3% in the first quarter of 2016. The medium-duty market was 23,200 units in the first quarter of 2017 compared to 23,300 units in the first quarter of 2016. The Company’s medium-duty market share was 17.1% in the first quarter of 2017 compared to 15.8% in the first quarter of 2016.

The over 16-tonne truck market in Europe for the first quarter of 2017 was 78,000 units compared to 74,900 units for the first quarter of 2016, and DAF’s market share was 15.7% in the first quarter of 2017, compared to 16.7% in the first quarter of 2016. The 6 to 16-tonne market in the first quarter of 2017 was 12,400 units compared to 11,700 units in the first quarter of 2016. DAF’s market share in the 6 to 16-tonne market for the first quarter of 2017 was 11.7%, an increase from 9.8% for the same period in 2016.

The Company’s worldwide truck net sales and revenues are summarized below:

<table>
<thead>

</tbody>
</table>

Pre-tax return on revenues

The Company’s worldwide truck net sales and revenues in the first quarter of 2017 decreased to $3.13 billion from $3.27 billion in the first quarter of 2016, primarily due to lower truck deliveries in the U.S. and Canada. For the first quarter of 2017, Truck segment income before income taxes and pre-tax return on revenues reflect lower truck unit deliveries and lower gross margins.
The major factors for the changes in net sales and revenues, cost of sales and revenues and gross margin between the three months ended March 31, 2017 and 2016 for the Truck segment are as follows:

<table>
<thead>
<tr>
<th></th>
<th>NET SALES AND REVENUES</th>

<td>$2,795.5</td>
<td>$334.6</td>
</tr>
</tbody>
</table>

- Truck delivery volume reflects lower truck unit deliveries in the U.S. and Canada, which resulted in lower sales ($156.1 million) and cost of sales ($132.0 million). This decrease was partially offset by higher truck deliveries in Europe, which resulted in higher sales ($78.6 million) and cost of sales ($71.0 million), and higher truck deliveries in Mexico, which resulted in higher sales ($17.1 million) and cost of sales ($14.1 million).

- Average truck sales prices increased sales by $11.1 million, primarily due to higher price realization in Europe ($15.8 million).

- Average cost per truck increased cost of sales by $23.2 million, reflecting higher material costs from higher content trucks.

- Factory overhead and other indirect costs increased $9.3 million, primarily due to higher salaries and related expense and higher depreciation and maintenance expense.

- Operating lease revenues decreased by $47.0 million and cost of sales decreased by $45.8 million, reflecting higher revenues deferred and lower revenues recognized.

- The currency translation effect on sales and cost of sales primarily reflects a decline in the value of the British pound and euro relative to the U.S. dollar.

- Truck gross margin in the first quarter of 2017 of 10.7% decreased from 12.1% in the same period in 2016 due to the factors noted above.

Truck SG&A for the first quarter of 2017 increased to $51.1 million from $49.1 million in the first quarter of 2016. The increase was primarily due to higher salaries and related expenses ($3.1 million), partially offset by lower sales and marketing costs ($1.6 million). As a percentage of sales, Truck SG&A increased to 1.6% in the first quarter of 2017 compared to 1.5% in the same period of 2016, reflecting the lower sales volume.
Parts

The Company’s Parts segment accounted for 19% of revenues in the first quarter of 2017 compared to 17% in the first quarter of 2016.

<table>

</table>

The Company’s worldwide parts net sales and revenues for the first quarter increased to $786.7 million in 2017 from $719.5 million in 2016, primarily due to higher aftermarket demand in the U.S. and Canada.

The increase in Parts segment income before income taxes and pre-tax return on revenues in the first quarter of 2017 was primarily due to the higher sales volume.

The major factors for the changes in net sales and revenues, cost of sales and revenues and gross margin between the three months ended March 31, 2017 and 2016 for the Parts segment are as follows:

<table>
<thead>
<tr>
<th>($ in millions)</th>

<td>51.4</td>
<td>15.8</td>
</tr>
</tbody>
</table>

Three Months Ended March 31, 2017 | $786.7 | $570.5 | $216.2 |

- Aftermarket parts sales volume increased by $78.6 million and related cost of sales increased by $50.2 million, primarily due to higher market demand in the U.S. and Canada.
- Average aftermarket parts direct costs increased $2.3 million due to higher material costs.
- Warehouse and other indirect costs increased $3.5 million, primarily due to higher salaries and related expenses to support the higher sales volume.
- The currency translation effect on sales and cost of sales primarily reflects a decline in the value of the British pound and euro relative to the U.S. dollar.
- Parts gross margins in the first quarter of 2017 decreased to 27.5% from 27.9% in the first quarter of 2016 due to the factors noted above.

Parts SG&A expense for the first quarter of 2017 decreased to $47.2 million from $47.8 million in the first quarter of 2016. As a percentage of sales, Parts SG&A decreased to 6.0% in the first quarter of 2017 from 6.6% in the first quarter of 2016, primarily due to higher net sales.
Financial Services

The Company’s Financial Services segment accounted for 7% of revenues in the first quarter of 2017 and 2016.

</table>

New loan and lease volume was $801.2 million in the first quarter of 2017 compared to $890.2 million in the first quarter of 2016, reflecting lower truck deliveries in the U.S. and Canada. In the first quarter of 2017, PFS finance market share on new PACCAR truck sales was 24.1%, comparable to 24.0% in the first quarter of 2016.

In the first quarter of 2017, PFS revenues increased to $302.2 million from $289.4 million in the first quarter of 2016. The increase was primarily due to revenues on higher average operating lease earning assets, partially offset by the effects of currency translation, which lowered PFS revenues by $6.8 million for the first quarter of 2017.

PFS income before income taxes decreased to $57.3 million for the first quarter of 2017 from $80.3 million in the first quarter of 2016, primarily due to lower results on returned lease assets, higher borrowing rates and a higher provision for losses on receivables.
Included in Financial Services “Other Assets” on the Company’s Consolidated Balance Sheets are used trucks held for sale, net of impairments, of $239.8 million at March 31, 2017 and $267.2 million at December 31, 2016. These trucks are primarily related to units returned from matured operating leases in the ordinary course of business, and may also include trucks acquired from repossessions or through acquisitions of used trucks in trades related to new truck sales. In the first quarter, the Company recognized losses on used trucks, excluding repossessions, of $12.9 million in 2017 and $2.4 million in 2016, including losses on multiple unit transactions of $8.5 million in 2017 and $1.2 million in 2016. Used truck losses related to repossessions, which are recognized as credit losses, were not significant for the first quarters of 2017 and 2016.

The major factors for the changes in interest and fees, interest and other borrowing expenses and finance margin between the three months ended March 31, 2017 and 2016 are outlined below:

Three Months Ended March 31, 2017

- Average finance receivables decreased $329.7 million (excluding foreign exchange effects) in the first quarter of 2017 as a result of lower dealer wholesale financing.
- Average debt balances decreased $64.7 million (excluding foreign exchange effects) in the first quarter of 2017. The lower average debt balances reflect funding for a lower average earning asset portfolio, which includes loans, finance leases, wholesale and equipment on operating lease.
- Higher portfolio yields (4.9% in 2017 compared to 4.8% in 2016) increased interest and fees by $1.7 million.
- Higher borrowing rates (1.7% in 2017 compared to 1.4% in 2016) were primarily due to higher debt market rates in North America, partially offset by lower debt market rates in Europe.
- The currency translation effects reflect a decline in the value of foreign currencies relative to the U.S. dollar.

</tr>
</tbody>
</table>

- A higher volume of used truck sales increased operating lease, rental and other revenues by $9.5 million. Depreciation and other expenses increased by $8.5 million due to higher volume and impairments of used trucks, reflecting lower used truck prices.
- Results on returned lease assets increased depreciation and other expenses by $11.5 million, primarily due to higher losses on sales of returned lease units.
- Average operating lease assets increased $249.3 million (excluding foreign exchange effects), which increased revenues by $13.6 million and related depreciation and other expenses by $11.3 million.
- Revenue per asset decreased $1.2 million primarily due to lower rental income. Cost per asset increased $.8 million due to higher depreciation expense, partially offset by lower vehicle operating expenses.
- The currency translation effects reflect a decline in the value of foreign currencies relative to the U.S. dollar.

The following table summarizes the provision for losses on receivables and net charge-offs:

<table>
<thead>
<tr>
<th>($ in millions)</th>
<th>PROVISION FOR LOSSES ON RECEIVABLES</th>
<th>NET CHARGE-OFFS</th>
<th>PROVISION FOR LOSSES ON RECEIVABLES</th>
<th>NET CHARGE-OFFS</th>

<td>$3.4</td>
<td>$5.2</td>
</tr>
</tbody>
</table>

The provision for losses on receivables was $5.9 million for the first quarter of 2017 compared to $3.4 million for the first quarter of 2016, reflecting continued good portfolio performance.

The Company modifies loans and finance leases as a normal part of its Financial Services operations. The Company may modify loans and finance leases for commercial reasons or for credit reasons. Modifications for commercial reasons are changes to contract terms for customers that are not considered to be in financial difficulty. Insignificant delays are modifications extending terms up to three months for customers experiencing some short-term financial stress, but not considered to be in financial difficulty. Modifications for credit reasons are changes to contract terms for customers considered to be in financial difficulty. The Company’s modifications typically result in granting more time to pay the contractual amounts owed and charging a fee and interest for the term of the modification. When considering whether to modify customer accounts for credit reasons, the Company evaluates the creditworthiness of the customers and modifies those accounts that the Company considers likely to perform under the modified terms. When the Company modifies loans and finance leases for credit reasons and grants a concession, the modifications are classified as troubled debt restructurings (TDR).
The post-modification balance of accounts modified during the three months ended March 31, 2017 and 2016 are summarized below:

($ in millions)

<table>

</tbody>
</table>

* Recorded investment immediately after modification as a percentage of ending retail portfolio, on an annualized basis.

During the first quarter of 2017, total modification activity increased compared to the first quarter of 2016, primarily due to higher modifications for credit – no concession, reflecting contract modifications for three fleet customers in Mexico and one in Australia.

The following table summarizes the Company’s 30+ days past due accounts:

<table>
<thead>
<tr>
<th>Percentage of retail loan and lease accounts 30+ days past due:</th>
<th>March 31 2017</th>
<th>December 31 2016</th>
<th>March 31 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>U.S. and Canada</td>
<td>.2%</td>
<td>.3%</td>
<td>.2%</td>
</tr>
<tr>
<td>Europe</td>
<td>.6%</td>
<td>.5%</td>
<td>.7%</td>
</tr>
<tr>
<td>Mexico, Australia and other</td>
<td>2.6%</td>
<td>1.8%</td>
<td>2.0%</td>
</tr>
<tr>
<td>Worldwide</td>
<td>.6%</td>
<td>.5%</td>
<td>.5%</td>
</tr>
</tbody>
</table>

Accounts 30+ days past due were .6% at March 31, 2017 and .5% at December 31, 2016, as higher past due accounts in Europe, Mexico and Australia were partially offset by lower past dues in the U.S. and Canada. The Company continues to focus on maintaining low past due balances.

When the Company modifies a 30+ days past due account, the customer is then generally considered current under the revised contractual terms. The Company modified $2.6 million of accounts worldwide during the first quarter of 2017, $2.6 million during the fourth quarter of 2016 and $4 million during the first quarter of 2016 which were 30+ days past due and became current at the time of modification. Had these accounts not been modified and continued to not make payments, the pro forma percentage of retail loan and lease accounts 30+ days past due would have been as follows:

<table>
<thead>
<tr>
<th>Pro forma percentage of retail loan and lease accounts 30+ days past due:</th>
<th>March 31 2017</th>
<th>December 31 2016</th>
<th>March 31 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>U.S. and Canada</td>
<td>.2%</td>
<td>.3%</td>
<td>.2%</td>

<td>2.0%</td>
<td>2.0%</td>
</tr>
<tr>
<td>Worldwide</td>
<td>.7%</td>
<td>.6%</td>
<td>.5%</td>
</tr>
</tbody>
</table>
Modifications of accounts in prior quarters that were more than 30 days past due at the time of modification are included in past dues if they were not performing under the modified terms at March 31, 2017, December 31, 2016 and March 31, 2016. The effect on the allowance for credit losses from such modifications was not significant at March 31, 2017, December 31, 2016 and March 31, 2016.

The Company’s annualized pre-tax return on average earning assets for Financial Services was 2.0% for the first quarter of 2017 compared to 2.8% for the same period in 2016.

**Other**

Other includes the winch business as well as sales, income and expenses not attributable to a reportable segment, including the EC charge and a portion of corporate expense. Other sales represent less than 1% of consolidated net sales and revenues for both the first quarter of 2017 and 2016. Other SG&A of $13.0 million for the first quarter of 2017 was comparable to $13.5 million for the first quarter of 2016. For the first quarter, other income (loss) before tax was a loss of $10.6 million in 2017 compared to a loss of $954.3 million in 2016. The lower loss in 2017 was primarily due to the EC charge in the first quarter of 2016.

Investment income increased to $8.1 million in the first quarter of 2017 from $5.7 million in the first quarter of 2016. The higher investment income in the first quarter of 2017 was primarily due to higher yields on investments due to higher market interest rates in the U.S., partially offset by lower average portfolio balances.

**Income Taxes**

The effective tax rate for the first quarter of 2017 was 30.8% compared to a negative 38.4% for the first quarter of 2016. Substantially all of the difference in tax rates was due to the non-deductible EC charge of $942.6 million in 2016.

<table>
<thead>
<tr>

<td>(10.0)%</td>
<td></td>
</tr>
</tbody>
</table>

For the first quarter of 2017, the decrease in income before income taxes and return on revenues for domestic operations was primarily due to lower revenues from truck operations. In the first quarter of 2016, the EC charge of $942.6 million resulted in a loss before income taxes and a negative return on revenues for foreign operations. Excluding the 2016 EC charge, foreign operations income before income taxes and return on revenues decreased in 2017 primarily due to lower margins from Europe and Mexico truck operations.

**LIQUIDITY AND CAPITAL RESOURCES:**

</tr>
</tbody>
</table>

The Company’s total cash and marketable debt securities at March 31, 2017 decreased $85.8 million from the balances at December 31, 2016, primarily due to a decrease in cash and cash equivalents, partially offset by an increase in marketable debt securities.
The change in cash and cash equivalents is summarized below:

($ in millions)

</tr>
</tbody>
</table>

**Operating activities:** Cash provided by operations decreased by $185.3 million to $610.5 million in the first quarter of 2017 from $795.8 million in 2016. The net loss in 2016 reflects the EC non-cash charge of $942.6 million. Lower operating cash flows reflect $154.5 million from Financial Services segment wholesale receivables, as originations exceeded cash receipts in the first quarter of 2017 ($80.8 million) compared to cash receipts exceeding originations in 2016 ($73.7 million). In addition, lower cash from operations reflects a higher cash usage of $65.0 million from accounts receivable as sales and services exceeded cash receipts.

**Investing activities:** Cash used in investing activities increased by $44.8 million to $337.0 million in the first quarter of 2017 from $292.2 million in 2016. Higher net cash used in investing activities reflects $74.3 million from marketable debt securities as there were $60.3 million in net purchases of marketable debt securities in the first quarter of 2017 versus $14.0 million in net proceeds from sales of marketable debt securities in 2016. This was partially offset by $42.0 million from retail loans and direct financing leases, as the first quarter of 2017 had net collections of $30.6 million compared to net originations of $11.4 million in 2016.

**Financing activities:** Cash used in financing activities was $445.7 million for the first quarter of 2017 compared to cash used in financing activities of $722.9 million in 2016, a decrease of $277.2 million. The Company paid $294.7 million in dividends in the first quarter of 2017 compared to $576.9 million in 2016; the decrease of $282.2 million was primarily due to a lower 2016 special dividend paid in January 2017. In the first quarter of 2016, the Company repurchased 1.1 million shares of common stock for $56.3 million, and there were no stock repurchases in 2017. In the first quarter of 2017, the Company issued $412.0 million of term debt, increased its outstanding commercial paper and short-term bank loans by $18.8 million and repaid term debt of $599.6 million. In the first quarter of 2016, the Company issued $525.6 million of term debt, repaid term debt of $500.0 million and reduced its outstanding commercial paper and short-term bank loans by $117.9 million. This resulted in cash used in borrowing activities of $168.8 million in the first quarter of 2017, $76.5 million higher than the cash used in borrowing activities of $92.3 million in 2016.

**Credit Lines and Other**

The Company has line of credit arrangements of $3.46 billion, of which $3.21 billion were unused at March 31, 2017. Included in these arrangements are $3.0 billion of syndicated bank facilities, of which $1.0 billion expires in June 2017, $1.0 billion expires in June 2020 and $1.0 billion expires in June 2021. The Company intends to extend or replace these credit facilities on or before expiration to maintain facilities of similar amounts and duration. These credit facilities are maintained primarily to provide backup liquidity for commercial paper borrowings and maturing medium-term notes. There were no borrowings under the syndicated bank facilities for the three months ended March 31, 2017.

On September 23, 2015, PACCAR’s Board of Directors approved the repurchase of up to $300.0 million of the Company’s common stock, and as of March 31, 2017, $206.7 million of shares have been repurchased pursuant to the 2015 authorization.
PACCAR Inc – Form 10-Q

Truck, Parts and Other

The Company provides funding for working capital, capital expenditures, R&D, dividends, stock repurchases and other business initiatives and commitments primarily from cash provided by operations. Management expects this method of funding to continue in the future.

Investments for property, plant and equipment in the first quarter of 2017 increased to $71.3 million from $61.4 million for the same period of 2016, primarily due to higher investments by DAF in Europe. Over the past decade, the Company’s combined investments in worldwide capital projects and R&D totaled $6.14 billion, and have significantly increased the operating capacity and efficiency of its facilities and enhanced the quality and operating efficiency of the Company’s premium products.

In 2017, capital investments are expected to be $375 to $425 million, and R&D is expected to be $250 to $280 million. The Company is investing for future growth in PACCAR’s new truck models, integrated powertrain, advanced driver assistance and truck connectivity technologies, and additional capacity and operating efficiency of the Company’s manufacturing and parts distribution facilities.

The Company conducts business in certain countries which have been experiencing or may experience significant financial stress, fiscal or political strain and are subject to the corresponding potential for default. The Company routinely monitors its financial exposure to global financial conditions, global counterparties and operating environments. As of March 31, 2017, the Company’s exposures in such countries were insignificant.

Financial Services

The Company funds its financial services activities primarily from collections on existing finance receivables and borrowings in the capital markets. The primary sources of borrowings in the capital markets are commercial paper and medium-term notes issued in the public markets and, to a lesser extent, bank loans. An additional source of funds is loans from other PACCAR companies.

The Company issues commercial paper for a portion of its funding in its Financial Services segment. Some of this commercial paper is converted to fixed interest rate debt through the use of interest-rate swaps, which are used to manage interest-rate risk.

In November 2015, the Company’s U.S. finance subsidiary, PACCAR Financial Corp. (PFC), filed a shelf registration under the Securities Act of 1933. The total amount of medium-term notes outstanding for PFC as of March 31, 2017 was $4.65 billion. The registration expires in November 2018 and does not limit the principal amount of debt securities that may be issued during that period.

As of March 31, 2017, the Company’s European finance subsidiary, PACCAR Financial Europe, had €1,405.5 million available for issuance under a €2.50 billion medium-term note program listed on the Professional Securities Market of the London Stock Exchange. This program replaced an expiring program in the second quarter of 2016 and is renewable annually through the filing of new listing particulars.

In April 2016, PACCAR Financial Mexico registered a 10.00 billion peso medium-term note and commercial paper program with the Comision Nacional Bancaria y de Valores. The registration expires in April 2021 and limits the amount of commercial paper (up to one year) to 5.00 billion pesos. At March 31, 2017, 8.33 billion pesos were available for issuance.
In the event of a future significant disruption in the financial markets, the Company may not be able to issue replacement commercial paper. As a result, the Company is exposed to liquidity risk from the shorter maturity of short-term borrowings paid to lenders compared to the longer timing of receivable collections from customers. The Company believes its cash balances and investments, collections on existing finance receivables, syndicated bank lines and current investment-grade credit ratings of A+/A1 will continue to provide it with sufficient resources and access to capital markets at competitive interest rates and therefore contribute to the Company maintaining its liquidity and financial stability. A decrease in these credit ratings could negatively impact the Company’s ability to access capital markets at competitive interest rates and the Company’s ability to maintain liquidity and financial stability. PACCAR believes its Financial Services companies will be able to continue funding receivables, servicing debt and paying dividends through internally generated funds, access to public and private debt markets and lines of credit.

RECONCILIATION OF GAAP TO NON-GAAP FINANCIAL MEASURES:

This Form 10-Q includes “adjusted net income (non-GAAP)” and “adjusted net income per diluted share (non-GAAP)”, which are financial measures that are not in accordance with U.S. generally accepted accounting principles (“GAAP”), since they exclude the non-recurring EC charge in 2016. These measures differ from the most directly comparable measures calculated in accordance with GAAP and may not be comparable to similarly titled non-GAAP financial measures used by other companies. In addition, this Form 10-Q includes the financial ratio noted below calculated based on a non-GAAP measure.

Management utilizes these non-GAAP measures to evaluate the Company’s performance and believes these measures allow investors and management to evaluate operating trends by excluding a significant non-recurring charge that is not representative of underlying operating trends.

Reconciliations from the most directly comparable GAAP measures to adjusted non-GAAP measures are as follows:

<table>

FORWARD-LOOKING STATEMENTS:

This report contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements relating to future results of operations or financial position and any other statement that does not relate to any historical or current fact. Such statements are based on currently available operating, financial and other information and are subject to risks and uncertainties that may affect actual results. Risks and uncertainties include, but are not limited to: a significant decline in industry sales; competitive pressures; reduced market share; reduced availability of or higher prices for fuel; increased safety, emissions, or other regulations resulting in higher costs and/or sales restrictions; currency or commodity price fluctuations; lower used truck prices; insufficient or under-utilization of manufacturing capacity; supplier interruptions; insufficient liquidity in the capital markets; fluctuations in interest rates; changes in the levels of the Financial Services segment new business volume due to unit fluctuations in new PACCAR truck sales or reduced market shares; changes affecting the profitability of truck owners and operators; price changes impacting truck sales prices and residual values; insufficient supplier capacity or access to raw materials; labor disruptions; shortages of commercial truck drivers; increased warranty costs or litigation; or legislative and governmental regulations. A more detailed description of these and other risks is included under the heading Part 1, Item 1A, “Risk Factors” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2016.
ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
There were no material changes in the Company’s market risk during the three months ended March 31, 2017. For additional information, refer to Item 7A as presented in the 2016 Annual Report on Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES
The Company’s management, with the participation of the Principal Executive Officer and Principal Financial Officer, conducted an evaluation of the effectiveness of the Company’s disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the period covered by this report. Based on that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that the Company’s disclosure controls and procedures were effective as of the end of the period covered by this report.

There have been no significant changes in the Company’s internal controls over financial reporting that occurred during the fiscal quarter covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II – OTHER INFORMATION
For Items 3, 4 and 5, there was no reportable information for the three months ended March 31, 2017.

ITEM 1. LEGAL PROCEEDINGS
The Company and its subsidiaries are parties to various lawsuits incidental to the ordinary course of business. Management believes that the disposition of such lawsuits will not materially affect the Company’s business or financial condition.

ITEM 1A. RISK FACTORS
For information regarding risk factors, refer to Part I, Item 1A as presented in the 2016 Annual Report on Form 10-K. There have been no material changes in the Company’s risk factors during the three months ended March 31, 2017.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
For Items 2(a) and (b), there was no reportable information for the three months ended March 31, 2017.

(c) Issuer purchases of equity securities.

On September 23, 2015, the Company’s Board of Directors approved a plan to repurchase up to $300 million of the Company’s outstanding common stock. As of March 31, 2017, the Company has repurchased 4.1 million shares for $206.7 million under this plan. There were no repurchases made under this plan during the first quarter of 2017.

ITEM 6. EXHIBITS
Any exhibits filed herewith are listed in the accompanying index to exhibits.
Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CERTIFICATIONS

I, Ronald E. Armstrong, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PACCAR Inc;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.
